

KLEOPHA SINDEL

ROBOTICS ENGINEER

CONTACT

- ✉ kleophasindel@gmail.com
- 📍 Grenoble, France
- 🌐 [LinkedIn Profile](#)
- 🚗 Driving licence: Category B
- 🤝 References: Available upon request

SKILLS

- **Programming:** Python, C++
- **Robotics:** ROS/ROS2, MoveIt, Gazebo, RViz, RoboDK
- **Industrial Robotics:** PolyScope (Universal Robots), DR-DART (Doosan Robotics), RoboGuide (FANUC)
- **Embedded Systems:** Raspberry Pi, Arduino
- **CAD:** Autodesk Inventor, Fusion 360, FreeCAD (Solidworks)

ASSOCIATIONS

- **Treasurer** - BDE Polytech Dijon, Le Creusot 2024 - 2025
 - Managed budgeting and financial tracking for student association activities
- **Entrepreneurship Programme** - Les Entrep' 2023 - 2024
 - Participated in a team-based entrepreneurship programme
 - Developed project planning and business modelling skills

LANGUAGES

- French (Native)
- English (Native)
 - TOEIC: 990/990 (2023)
- German (Native)
- Spanish (Beginner)

HOBBIES

3D printing, Running, Badminton, Traveling

PROFILE

Recent Robotics Engineering graduate with hands-on experience in autonomous mobile robots, industrial robotics, and embedded systems. Through academic projects and a 4 and a 6-month internship at Bosch, I have developed practical skills in robotic system integration and automation. Trilingual in French, English, and German, I am seeking a Robotics Engineer position.

WORK EXPERIENCE

- **Robert Bosch SEA - Singapore** 02/2026 - PRESENT
R&D Engineering Intern
 - Developed a multi-modal **RAG** system enabling conversational querying of technical documents using multiple LLM components.
 - Engineered a **ROS 2**-based perception and control pipeline for a UR30 robot, integrating **hand-eye calibration** and evaluating Template Matching, **SAM**, and **YOLO** for high-precision PCB pick-and-place applications. Developed a customer-ready demonstration to support technical client presentations.
- **Robert Bosch GmbH - Renningen, Germany** 04-07/2025
R&D Engineering Intern
 - Designed, 3D-printed, and tested prototypes for an autonomous mobile robot charging station using **Autodesk Inventor** and **DFMA** principles; submitted an internal **Bosch Innovation proposal** for potential patent filing.
 - Programmed and validated the performance of a Doosan collaborative robot, carrying out trajectory and repeatability testing.
- **Schneider Electric - Grenoble, France** 08/2024
Engineering Intern
 - Diagnosed and tested relay card hardware issues using circuit analysis and **LTspice** simulations.
 - Developed and validated **EcoStruxure Operator Terminal Expert** (EOTE) HMI solutions, including PLC communication, project migration, and reusable interface designs.

EDUCATION

- **Polytech Dijon, Le Creusot** 2021 - 2026
Diplôme d'ingénieur (MSc)
 - Robotics studies covering computer vision, control, embedded systems, and perception.
 - Hands-on robotics projects focused on automation, perception, and real-time control.
- **Lycée International Europole, Grenoble** 2018-2021
AbiBac
Dual diploma: French Baccalauréat - Mention Bien / German Abitur - Grade: 1.3

PROJECTS

- **ROS Mobile Robotics Platform** 2024-2025
 - Built **ROS**-based system on existing mobile robot (WiFiBot)
 - Integrated **LiDAR** and camera for perception and ArUco-based localisation
 - Developed remote control and **communication system** for robot operation
- **Human-Robot Collaboration (Doosan M0609)** 2025
 - Simulated and programmed cobot assembly tasks in **RoboDK**
 - Tested Doosan M0609 execution for collaborative assembly workflow
